JUSTIN LAMPE

SUMMARY

Ardent web developer adept at building user interfaces and business communication.

SKILLS

Proficient: HTML, CSS, JavaScript. React

Experienced: Node.js, jQuery, Git, Bootstrap, WordPress

Familiar: MySQL, MongoDB, Firebase

PROJECTS

TUBECAST

GitHub Repo - https://github.com/PierreLampre/tubecast

Deployed - https://tubecast.netlify.app

A React application that runs a schedule of television programs hosted on YouTube. A nod to the classic, blue Comcast menu screen, users can view programs on the channel schedule or peruse programs on demand.

KEEP YOURSELF ALIVE

GitHub Repo - https://github.com/PierreLampre/medicine-tracker

Deployed - https://keepyourselfalive.netlify.app

A React application that generates a timestamp of when you took your medication. Timestamps persist to local storage for future reference.

PORTFOLIO
